

High surfactant methylated oil concentrate

APENPE
FREE

SHOCKER

MYRIAD TECHNOLOGY APE/NPE FREE

SHOCKER® is a CDPA certified high surfactant methylated seed oil concentrate formulated with MYRIAD® Technology to facilitate excellent compatibility, spreading on the leaf and penetration through the plant's waxy cuticle. It is designed for use with pesticides that require methylated seed oils (MSOs) or crop oil concentrates (COCs). SHOCKER is a highly effective adjuvant that offers lower use rates compared to traditional MSO or COC. This flexibility in application rates result in its ability to reduce crop response while enhancing herbicide efficacy. SHOCKER promotes sustainability by utilizing plant-derived ingredients and being APE/NPE free.

FEATURES & BENEFITS

- High surfactant methylated oil concentrate.
- Uses lower rates than traditional MSOs or crop oils.
- Designed for use with pesticides requiring MSOs or COCs.

MODE OF ACTION

- Excellent spreading and coverage of the leaf surface.
- Effective penetration through the plant's waxy cuticle.
- Best used with post-emergent herbicides that require an oil based adjuvant.

ADDED VALUE

- Reduced material to handle and inventory.
- Flexible application rates reduce the risk of crop response.
- Excellent compatibility.
- Superior cuticle penetration.
- Proprietary plant-derived ingredients.
- CDPA certified and APE/NPE Free.
