

MANAGING SPRAY SOLUTION pH with ATTITUDE

Achieving peak performance of crop inputs often depends on maintaining the correct pH of the spray tank solution.

ATTITUDE™ is a OMRI-listed water conditioner and acidifying agent to reduce the pH of a tank mix solution. It should not be used with products that require a solution pH higher than 5, for example sulfonylurea herbicides or copper-based fungicides. ATTITUDE can lessen performance of products containing significant amounts of carbonates.

| | Hard Water (300 ppm) | Tap Water | Ounces/100 gallons to Achieve Desired PH |
|------------|-------------------------|-----------|------------------------------------------|
| Desired pH | 5.43 | 7.43 | 0 |
| | 3.21 | 5.77 | 8 |
| | 3.1 | 5.42 | 16 |
| | 2.96 | 4.38 | 32 |
| | 2.79 | 3.37 | 64 |
| | 2.63 | 2.92 | 128 |
