

# **OROBOOST®**

Foliar adjuvant for improving spreading,  
wetting and penetration of organic  
pesticides and nutrients

# OROBOOST®

APE/NPE  
FREE

OROBOOST® is the most versatile and effective certified organic non-ionic surfactant adjuvant available. It is safe for crops and beneficials across a wide range of geographies and environmental conditions. Featuring OROWET® technology, OROBOOST enhances the performance of foliar-applied pesticides, herbicides, nutrients, and PGRs. Its patented technologies ensure superior penetration and translocation of active ingredients, leading to improved efficacy and coverage. APE/NPE free, OMRI listed, and CPDA certified, OROBOOST offers growers confidence in its use for organic crops. With variable use rates it extends application opportunities and ensures safe, effective, and sustainable agricultural practices.

## FEATURES & BENEFITS

- Highly effective penetrant, spreader and wetting agent with OROWET® Technology.
- For use with organic pesticides.
- Classified as a non-ionic surfactant.
- Enhances effectiveness of foliar-applied pesticides, herbicides, foliar nutrients, and plant growth regulators.

## MODE OF ACTION

- OROWET® Technology for superior wetting and spreading.
- TransPhloem properties allow penetration of mobile, systemic, and translaminar products through the plant's waxy cuticle and into the vascular system.
- Ensures uniform droplet size and even spray distribution.
- Improves penetration into dense crop foliage.
- Does not limit photosynthesis or cause crop damage.

## ADDED VALUE

- Suitable for multiple crops needing organic certification.
- Variable use rates extend tank mix and application opportunities.
- Safer to beneficials compared to other adjuvants.
- Improves rain fastness due to penetration and translocation properties.
- Suitable for early pre-plant applications, in-season sprays, and fall/winter treatments.
- Promotes sustainable agricultural practices.
