

An OMRI-listed, 25(B) low volatility garlic oil for insecticidal and repellent action primarily against thrips, mites, aphids and white fly.

Features of Garland

- 100% pure and natural garlic essential oil (10%)
- Contains secondary essential sunflower and castor oils for extended pesticide action
- Outstanding contact control and repellency due to its essential oil's purity
- No garlic taste in crops
- Can be used on all crops
- 0-hour REI, 0-Day PHI, MRL exempt, no visible residue

Use Rate

- Foliar and soil applications: 32-64 oz/100 g of spray solution
