

# DISEASE MANAGEMENT WITH MILAGRUM PLUS + OROBOOST

Milagrum Plus® is an EPA registered organic pesticide derived from *Bacillus subtilis* with a 0-day PHI.

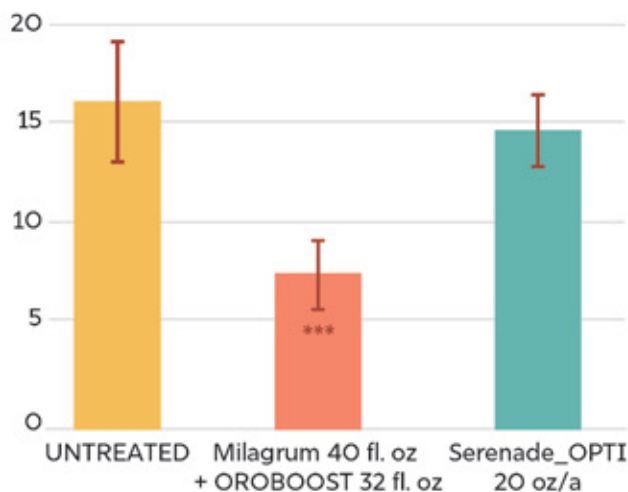

## CONTROL OF BROWN ROT BLOSSOM AND TWIG BLIGHT

Brown Rot Blossom and Twig Blight  
(*Monilinia fructicola*)

Blossom and twig blight count per tree at 7 DAA

Milagrum Plus + OROBOOST reduced blossom and twig blight incidence by 55%

\*\*\*  $p < 0.01$ , when compared to Untreated

### MILAGRUM PLUS

Bio-fungicide

- *Bacillus subtilis* with co-formulants to maximize disease control
- 3-way MOA: direct fungicidal control, plant ISR initiation and competitive exclusion

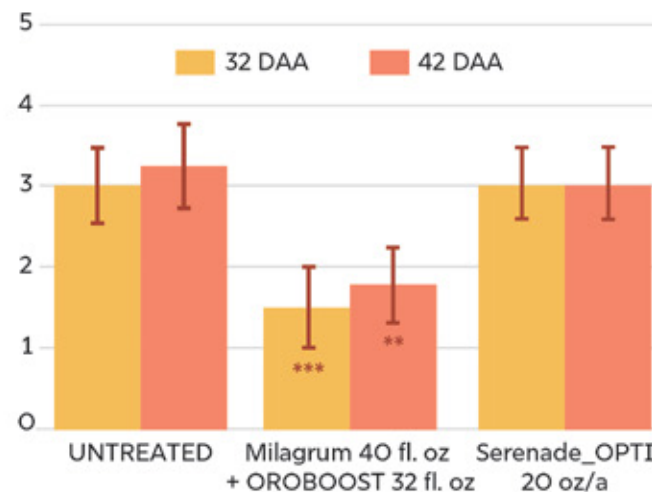

## CONTROL OF SHOT HOLE

Milagrum Plus controls Shot Hole  
(*Wilsonomyces carpophilus*)

Severity (%) on leaves at 35 & 42 DAA

Milagrum Plus + OROBOOST decreased disease severity

\*\*  $p < 0.05$ , \*\*\*  $p < 0.01$ , when compared to Untreated

### OROBOOST

Organic Foliar Adjuvant

Versatile: low rates for superior spreading of contact pesticides, higher rates for rapid penetration of the leaf's waxy cuticle for use with systemic pesticides and nutrients

## TRIAL DETAILS

Crop: Peaches 'Sierra Rich'  
Location: Escalon, CA

Foliar Application: March 24 and April 5, 2023  
Water volume: 100 gal/a
