

Spreader and soil wetting agent

MORTAR

MYRIAD
TECHNOLOGY

OMRI
LISTED

APE/NPE
FREE

MORTAR® is a soil wetting agent designed to improve infiltration and lateral distribution of water into the soil. Because of the improved distribution of water it can enhance the performance of soil-applied pesticides and nutrients. It is also an effective spreader to improve the coverage of herbicides calling for a non-ionic surfactant in burndown and desiccant applications. Being part of the MYRIAD® family of products it utilizes a patented formulation with a complex blend of botanical extracts and surfactants. MORTAR is CDPA certified, APE/NPE Free and OMRI listed for use in organic crop production offering growers a sustainable soil/water management tool.

FEATURES & BENEFITS

- Improves water infiltration.
- Improves lateral movement and distribution of water.
- Uniform distribution of soil applied pesticides.
- CDPA certified, APE/NPE free, and OMRI certified.

MODE OF ACTION

- Reduces surface tension and improves infiltration and lateral distribution of water.
- Reduces run-off and wasted water.
- Uniform distribution of applied nutrients or soil applied pesticides.
- Promotes even distribution of moisture in irrigation.
- Effective spreader for use in burndown or desiccation.
