

BioMax O.C.

Non-living microbial food source and
fertilizer designed to improve soil function

BioMax O.C.

BioMax O.C. is a non-living microbial food source and micronutrient designed to be compatible with ortho and polyphosphate based starter fertilizer blends. It accelerates the biological activity of beneficial soil microbes to improve soil nutrient availability.

FEATURES & BENEFITS

Produced through a bio-fermentation process utilizing proprietary bacteria. It is not an inoculant and does not contain any living organisms.

- Calcium (Ca) 1.0%
- Cobalt (Co) 0.2%
- Molybdenum (Mo) 0.05%

MODE OF ACTION

- Stimulates the soils native biology.
- Increases the population of beneficial soil microbes.
- Enhances nutrient cycling and nutrient availability.
- Encourages root development and overall root health.

ADDED VALUE

- Stimulates beneficial soil microbes.
- Increases nutrient availability and cycling.
- Improves soil physical properties .
- Enhances root development and health.
- Compatible the ortho and poly-phosphate starter fertilizers.
