

System-Cal

Foliar fertilizer designed
to improve fruit quality

System-Cal

System-Cal™ is a calcium and copper foliar fertilizer designed to improve fruit quality, firmness, and shelf life. Calcium is a key component of cell wall development and essential to improving overall fruit integrity. System-Cal is intended to supplement standard ground fertility programs and enhance crop quality and yield. Sysstem™ series products utilize phosphite-based technology to provide systemic nutrition, aiming to balance nutrient status and improve overall plant health.

FEATURES & BENEFITS

System-Cal combines calcium and copper.

- Calcium (Ca) 4.0%
- Copper (Cu) 0.25%

MODE OF ACTION

- Supplies Calcium to the fruit to improve overall fruit quality
- Systemic nutrition and mobility due to phosphite form
- Enhances natural root flushing process

ADDED VALUE

- Increases calcium levels in fruit
- Promotes proper nutrient ratios
- Minimizes quality issues related to calcium deficiency
- Easy to handle
- Compatible with fertilizers, insecticides, fungicides, and plant growth regulators
