

FUNGICIDE

Sysstem-K Blue

EPA-labeled potassium
phosphite solution

Sysstem-K Blue

Sysstem-K Blue is an EPA labeled potassium phosphite solution for control or suppression of a wide range of plant diseases in both soil and foliar applications. It acts primarily as a preventative fungicide by acting directly on the pathogen and stimulation of natural host defenses. Sysstem-K Blue is labeled in a broad range of crops including many food crops, ornamentals, turf and bedding plants. It offers a control option for several economically important disease casual agents such as *Phytophthora*, *Pythium*, *Fusarium*, *Rhizoctonia*, *Xanthomonas*, *Anthracnose*, and *Cercospora*.

FEATURES & BENEFITS

Sysstem-K Blue contains potassium phosphite, with 57% phosphorous acid (derived from mono- and dipotassium salts). It acts primarily as a preventative fungicide.

- Mono- and dipotassium phosphites* 57%
- Other ingredients 43%

MODE OF ACTION

- Suppresses pathogens
- Stimulates natural host defenses

ADDED VALUE

- Labeled on a broad range of food and ornamental crops
- Suppresses several economically important diseases

*Sysstem-K Blue contains 6.3 lbs/gal of active ingredients, mono- and dipotassium salts of phosphorous acid. Equivalent to 4.1 lbs of phosphorous acid/gal.
