

System-Ready

Early season nutrition that
starts before roots do

System-Ready

System-Ready™ is designed for early season use in a wide variety of row crops to meet peak nutrient demand timing for zinc and manganese. It delivers zinc and manganese where they are most needed, including developing roots and foliage. This is especially beneficial when spring soils are cold and wet, limiting nutrient availability and hindering root growth. It is compatible with glyphosate and most other pesticides, making it easy to integrate into spray programs.

FEATURES & BENEFITS

System-Ready is a phosphite solution blend combining manganese and zinc.

- Manganese (Mn) 2.75%
- Zinc (Zn) 4.25%

MODE OF ACTION

- Delivers zinc & manganese to satisfy nutrient needs
- Systemic nutrition and mobility due to phosphite form
- Enhances natural root flushing process
- Improved nutrient and moisture uptake from the soil

ADDED VALUE

- Excellent partner for glyphosate
- Promotes early season root and leaf development
- Increases soil moisture and nutrient uptake
- Provides key micronutrients at peak demand for the crop
