

Top Set DL

A unique blend of nutrients for
effective flowering and crop set

Top Set DL

Top Set DL is Science-Driven Nutrition designed to prevent or correct boron and molybdenum deficiencies in crops. It uses a unique blend of boron and molybdenum to ensure plants have the nutrition necessary for effective flowering and crop set. Top Set DL provides these nutrients in a stable, sugar-based complex that is easily transported across cell membranes and metabolized by the plant system. Top Set DL is an excellent fit for pre-bloom sprays to ensure sufficient levels of both boron and molybdenum before and during flowering.

FEATURES & BENEFITS

Top Set DL is a Dextro-Lac® foliar micronutrient product containing boron and molybdenum.

- Boron (B) 9.0%
- Molybdenum (Mo) 0.5%

MODE OF ACTION

- Provides key nutrients boron and molybdenum.
- Easily transported into and metabolized by the plant system.

ADDED VALUE

- Excellent fit for pre-bloom sprays.
- Improves fruit set and quality.
- Maximizes flowering and crop set.
