

Vigor-Cal-Bor-Moly

Foliar nutrition designed to improve
fruit quality, yield and profitability

Vigor-Cal-Bor-Moly

Vigor-Cal-Bor-Moly™ is designed to effectively promote plant vigor and provide key elements in maximizing fruit quality. Combining boron and molybdenum with the calcium make it an excellent fit for pre-bloom sprays to improve fruit set and quality.

FEATURES & BENEFITS

Vigor-Cal-Bor-Moly™ is a foliar calcium derived from calcium carbonate. A series of proprietary manufacturing processes are used to separate the calcium from the carbonate molecule and link it to a polysaccharide molecule, creating a sugar based nutrient product. Vigor Enhanced Nutrients further improve the efficiency of the Dextro-Lac Technology by adding a biological finishing package with specific nutrient combinations such as the boron and molybdenum to meet individual crop needs.

- Calcium (Ca) 5.0%
- Boron (B) 0.4%
- Molybdenum (Mo) 0.2%

MODE OF ACTION

- Penetrates plant leaves, emerging buds, and the skin of fruit.
- Easily metabolized and utilized as needed by the plant.
- Calcium improves fruit quality.
- Molybdenum improves fruit set.
- Boron promotes flowering and pollination.

ADDED VALUE

- Improves fruit quality
- Improves fruit set and pollination
- Promotes plant vigor
