WETCIT® is a cutting-edge penetrant, spreader and wetting agent for use in vegetables and broad acre crops. It serves as a highly effective non-ionic surfactant (NIS) that enhances the performance of foliar-applied pesticides and nutrients. WETCIT is certified by CPDA and free from APE and NPE for environmental safety.

FEATURES & BENEFITS

WETCIT® is a unique, proprietary blend formulated using OROWET® Technology and premium compatibility and wetting agents. This combination makes it an effective penetrant, spreader and wetting agent for foliar-applied herbicides, pesticides, foliar nutrients, and plant growth regulators (PGRs). WETCIT is CPDA certified and free from APE and NPE.

MODE OF ACTION

- OROWET® Technology for superior wetting and spreading.
- TRANSPHOLEM® properties for better penetration and translocation.
- Enhances rain fastness to better manage spray applications.
- Uniform droplet size ensures consistent distribution and better coverage
- Quick drying reduces leaf wetness, minimizing disease risk
- CPDA certified, APE/NPE free.

ADDED VALUE

- Safe for all crops and growth stages.
- Simplifies crop programs
- Flexibility replacing various other adjuvants
- Biodegradable Ingredients
- Patented technology and formulation
- Pleasant orange smell masks chemical odor
- 100% USA-sourced ingredients and manufactured in the USA
